DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 3-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites the ~~solid~~ ^{solid *EA*} core having a distortion of 2.6 to 3.0mm. The specification allows for the deformation range to be 2.6 to 6.5 mm and the illustrative examples within the specification allow for the deformation to be 2.8 to 4.5mm. Applicant arbitrary selection of range creates a new matter issue. The goal of the invention is to increase flight distance but the increase flight distance is shown to occur at 4.5mm distortion.

Allowable Subject Matter

Claim 9 is allowed.
